CBRE

Contractor:

D. Evans Ltd., Leeds

Materials & Inspection:

Giromax Technology Ltd.

Project Size:

2,750 m²

Products Used:

(click for further information)

SEAMSIL® for cut edge corrosion

DELCOTE® for roof recoating

Specification:

After over 20 years on a North Shields industrial estate, the existing PVC-coated roof sheets had adequately stood the test of time but had finally reached their “re-paint decision time”. The successful business units now chose this opportunity to re-instate their roofing coating. The roof was first treated with Seamsil, preventing further corrosion in the critical lap joint areas followed by a two coat application of Delcote silicone coating, spray applied to a finish colour of Albany Grey to provide complete weather and corrosion resistance for many years to come.
